

CAERS

CANADIAN ADVERSE EVENT REPORTING SYSTEM

An independent reporting system created by Canadians for Canadians

CAERS is a COVID-19 inoculation adverse event reporting system, separate from government and public health agencies.

We provide a safe place where your story will be heard and your experiences documented in a secure and confidential manner.

In addition to providing an alternative to Health Canada's flawed reporting system, CAERS is seeking to facilitate treatment, legal actions, testimonies and independent data analysis at the **National Citizens' Inquiry** across Canada.

Your story is valid and You are not alone
